

Google Business Profile — How to give Adverton access

What this is for: Your Google Business Profile (GBP) is the listing that shows up on Google Maps and on the right side of Google search. To run it for you — post updates, respond to reviews, optimize your services and hours — Adverton needs **Manager** access.

Time required: 5 minutes.

What you'll need: - The Google email address you used (or will use) for your business listing. - A computer or phone with that account already logged in.

Path A — You already have a Google Business Profile

Most contractors created a GBP years ago, even if they don't actively use it. **Try this first.** If it turns out you don't have one, skip to **Path B**.

Step 1 — Go to your business profile

Open business.google.com in your browser. Sign in with the Google account that owns the listing.

Step 2 — Find the Managers section

Click on your business name. In the left side menu, click **Settings** → **Managers** (or look for the "people" icon).

Step 3 — Add Adverton

Click **Add** (top right). In the email field, type:

manager@adverton.net

Step 4 — Choose the role

A dropdown will ask you which role to assign. Select **Manager** (NOT "Owner"). Then click **Invite**.

Step 5 — Confirm

You should see "Pending" next to our email. We'll accept the invite within a few hours and confirm in writing.

Important: do NOT make us "Owner". Manager is enough — and it keeps full ownership in your hands.

Path B — You don't have a Google Business Profile yet

If you searched and couldn't find your business at business.google.com, it means no one has claimed it. **We'll create it for you** — but the verification step has to be done by you (Google requires it).

What we'll do

1. Create the listing using your business name, address, phone, hours, services.
2. Submit it for verification on your behalf.

What you'll do

3. Receive Google's verification — usually one of: - **A postcard** mailed to your business address (5–14 days). Has a 5-digit code on it. - **A short verification video** Google asks you to record from your phone showing the business location. Takes 60 seconds. - **Phone call** with a 6-digit code (less common).
4. Send us the code (or confirm you completed the video) by email. We enter it on Google's side.
5. Once verified, the listing is live. We optimize it from there — you don't have to touch anything else.

Heads-up: the postcard sometimes takes up to 2 weeks. The video method (when offered) is faster — pick that if Google gives you the option.

What happens next

Once we have access: - **Week 1:** we audit and clean up the listing — categories, services, hours, description, photos. - **Week 2 onward:** weekly updates posted on your behalf, every customer review responded to within 48 hours, monthly optimization based on what's converting.

You'll see all of it in your monthly report. You don't need to log into GBP again unless you want to.

Common issues

"I can't remember which Google email I used." Try every Gmail/Google account you've ever used. The owner is usually the original account. If still stuck, email us at support@adverton.net — we can help you recover it.

"Google says my listing is suspended." Don't worry — common, fixable. Forward us the suspension email and we'll handle the appeal.

"There's already a 'Manager' on my listing I don't recognize." Could be an old agency or a previous employee. You can remove them from the same Managers screen. If unsure who it is, email us first — we'll advise before you remove.

"I don't see the Managers option." You're probably on a tablet view. Try a desktop browser. If still missing, you may not be the Owner — only the Owner can add Managers. Email us and we'll guide you.
