

Facebook + Instagram — How to give Adverton access

Send this guide ONLY to clients on a plan that includes: - Social Media Posts add-on (\$199 / \$349 / \$499 per month), and/or - Meta Ads management add-on (\$199/month).

If the client is on the base \$799/mo plan with no Meta-related add-on, **skip this guide** — we don't run their FB/IG.

What this is for: if your plan includes Social Media Posts and/or Meta Ads, Adverton manages your Facebook + Instagram presence. **There are two different accesses you may need to grant,** depending on which add-ons you have:

If your plan includes...	You grant us...	Covered in
Social Media Posts (\$199–\$499/mo)	Page + Instagram access (so we can post organic content)	Part 1 below
Meta Ads (\$199/mo)	Page + Instagram access AND Ad Account access (separate permission to run paid campaigns)	Part 1 + Part 2 below
Both	All of the above	Part 1 + Part 2

These are two different asset types in Meta Business Manager. Page access does NOT include ad-account access, and vice versa. They're granted separately, with separate permissions.

Time required: 10 minutes.

What you'll need: - Your personal Facebook login (yes — Meta uses your personal account to manage business assets; this is normal). - Whether you already have a Facebook Page for your business, an Instagram Business Account, both, or neither.

Part 1 — Page + Instagram access (everyone with Social Posts OR Meta Ads needs this)

Quick chooser

Your situation	Path
I have a Facebook Page AND an Instagram Business Account	Path A — most common
I have a Facebook Page but no Instagram	Path B
I have an Instagram Business Account but no Facebook Page	Path C
I have neither	Path D — we create both
I'm not sure what I have	Start with Path A Step 1 — it'll tell you

Path A — You have both already

The cleanest way is via **Meta Business Suite**, which controls both platforms from one dashboard.

Step 1 — Log in

Go to business.facebook.com and sign in with your personal Facebook account (the one tied to your business Page).

Step 2 — Find Settings

Bottom-left corner: click the **gear icon** (⚙️) → **Business Settings**.

Step 3 — Add your business assets to Business Manager

If you haven't done this before, Meta will walk you through: - **Pages** → Add → select your Facebook Page. - **Instagram accounts** → Add → connect your IG Business Account (must be a Business or Creator account, not Personal). - **Ad accounts** → only relevant if you have Meta Ads in your plan. **Skip for now if your plan is Social Posts only.** If you have Meta Ads, see **Part 2** below.

Step 4 — Add Advertton as a Partner (Page + IG only)

- In Business Settings, left menu → **Users** → **Partners** (NOT "People" — Partners is for outside agencies).
- Click **Add** → **Give a partner access to your assets**.
- Enter Advertton's Business ID (we send it in your kickoff email — looks like `123456789012345`).
- Assign access:
- **Pages:** Manage Page (full access)
- **Instagram accounts:** Manage Account (full access)
- **Ad accounts: leave unchecked here.** If your plan includes Meta Ads, you grant ad-account access in **Part 2** below — it's a separate permission.

Step 5 — Confirm

Reply to the kickoff email: "*Partner access granted.*" We accept on our end within a few hours.

Why "Partner" not "User": giving us Partner access keeps you in full ownership control. We can post and manage; we cannot remove you, delete your Page, or change billing. If Adverton ever stops being your agency, you remove us from this same screen and we lose all access immediately.

Path B — Facebook Page only, no Instagram

We strongly recommend creating an Instagram Business Account because: 1. It's free. 2. Instagram drives meaningful local traffic for home services (especially for visual trades — roofing, landscaping, plumbing remodels). 3. It connects to your Facebook Page so we post once and it cross-publishes.

Step 1 — Create the Instagram account

On your phone, download Instagram. Sign up using your business email. Username should be your business name (e.g., @yourbusinessHVAC).

Step 2 — Convert to Business Account

In the Instagram app: **Profile** → **Menu (top right)** → **Settings and privacy** → **Account type and tools** → **Switch to professional account** → **Business**.

Pick a category (HVAC Services, Plumber, Roofer, etc.).

Step 3 — Connect Instagram to your Facebook Page

Same Settings screen → **Linked accounts** → **Facebook** → **Connect to Page** → select your business Page.

Step 4 — Now follow Path A

With both accounts in hand, go back to **Path A — Step 1** to grant Adverton access.

Path C — Instagram Business Account only, no Facebook Page

Less common but happens. We need a Facebook Page even if you don't plan to actively use Facebook, because: 1. Instagram Ads (when you take that add-on) require a connected Facebook Page. 2. Meta Business Suite needs a Page to anchor the business.

Step 1 — Create a Facebook Page

On desktop: go to facebook.com/pages/create. Pick **Business or Brand**. Fill in business name + category. Skip the optional photo uploads (we add those later).

Step 2 — Connect Page to Instagram

On the new Facebook Page → **Settings** → **Linked accounts** → **Instagram** → **Connect**.

Step 3 — Now follow Path A

Both assets in place — go to **Path A — Step 1**.

Path D — You have neither

We'll create both for you. Here's what happens:

What we'll do

1. Create a Facebook Page using your business name, address, phone, and a starter cover photo.
2. Create an Instagram Business Account with a matching handle.
3. Connect both accounts in Meta Business Manager.
4. Move them into our Partner system so we can post on your behalf.

What you'll do

1. Provide us 5–10 photos of your work in onboarding (Form_02).
2. Approve the cover photo + bio copy we draft (we send a preview link). One round of revisions, then we publish.
3. Done. You don't need to log in unless you want to.

Heads-up: to create the Facebook Page on your behalf, we use a **shared admin model** during setup — we create the Page from a temporary admin account, then transfer ownership to you and add ourselves as Partner. **You end up as the Page Owner**, not us. This keeps everything yours from the start.

Part 2 — Meta Ad Account access (ONLY if your plan includes Meta Ads \$199/mo)

If you're on Social Media Posts only and NOT on Meta Ads, **stop here** — Part 1 is everything you need. We don't need ad-account access to post organic content.

If your plan includes Meta Ads, we need separate access to a Meta Ad Account because that's where paid campaigns live. **Page-Manager access does NOT include ad-account access**, and vice versa — they're independent permissions in Business Manager.

Path E — You already have a Meta Ad Account

Rare for contractors who haven't run Meta Ads before, but happens (a former agency set one up, or you tried boosted posts).

Step 1 — Find the Ad Account

Business Settings → **Accounts** → **Ad Accounts**. You should see one or more accounts listed, each with an ID like `act_123456789` .

Step 2 — Add Advertiser as a Partner on the ad account

- Click your ad account → **Assign Partners** → **Add Partner**.
- Enter Advertiser's Business ID (same one from Part 1).
- Permission: choose **Manage Ad Account** (we need to create campaigns, set budgets, change targeting, see billing).

Step 3 — Confirm a payment method is on file

At business.facebook.com → **Billing & Payments**, make sure a valid card is set on the ad account. **Advertiser never sees your card**. Meta charges your card directly for ad spend.

Step 4 — Reply to your kickoff email

"Ad account Partner access granted." We accept and start building campaigns within 48 hours.

Path F — You don't have a Meta Ad Account yet

We provision a new one under your Business Manager.

What we'll do

1. Create a new ad account named after your business.
2. Link it to the Facebook Page we already have access to from Part 1.
3. Set timezone, currency, and business address.

What you'll do

4. Receive Meta's email asking you to add a payment method to the new ad account.
5. Open the link and **enter your business credit card directly with Meta**. Adverton never sees your card.
6. Reply to your kickoff email confirming the card is on file.

Step 7 — We start building campaigns

Once the card is on file and our Partner permission is active, we build your first campaign within 48 hours and submit it for Meta's review (1–24 hours).

What happens next

Once we have the right access (Part 1 only, or Part 1 + Part 2): - **Week 1:** we set up the bio, profile photo, cover photo, services list, contact info, and link to your website on Page + Instagram. - **Social Media Posts add-on (\$199–\$499/mo):** 12–16 posts per platform per month, with stories, reels, and engagement work. - **Meta Ads add-on (\$199/mo):** first paid campaign live within 1 week of ad-account access — typically a lead-gen ad with retargeting set up after the website launches.

You'll see post performance and follower growth in your monthly report.

Common issues

"My personal Facebook is connected to a Page my old business partner created and I can't access it." Common. Two paths: (a) ask Meta support to recover access using business documents — slow but works; (b) create a new Page from scratch and let the old one die. Tell us your situation in onboarding and we'll recommend which is faster.

"I don't want my personal Facebook tied to my business." You don't have to actively post from it — but Meta requires a personal account to be the original admin of any Business Manager. Think of it as a key, not a public identity. Your personal profile stays private; only the Business Page is public. Once we're set up as Partner, you literally never need to log in again.

"My Instagram has a different name than my Facebook." Not a problem. We'll align them in the bio (same business name shown publicly) even if the URL handles differ. Usernames are hard to change once established — we work with what you have.

"My Facebook Page has 12 followers and I'm embarrassed." So does every contractor we onboard. Within 90 days we've never seen a client with fewer than 100 followers (organic + light reach from posting). We don't run follower-buying schemes — but consistent, on-brand posting plus your monthly job photos brings real local follows.
